## ARITHMETICS & MATHEMATICS.

EDWARD BROOKS, A. M., amplicate the State Formal School of Penna-

Comprising a full course for Jommon Schools, High Schools, Academic seminaries and Normal Schools. E PLAN, SCOPE, THOROUGH-NISS and perfect simplicity of this Series commend it are judgment and approval of all who examine it. It emperes the following works:

REGGES NORMAL PRIMARY ARITHMETIC. besigned for the child's first text-book in the science of Arithmetic. A thoroughly philosophical and original work in its GROOKS NORMAL ELEMETARY ABITHMETIC, For Primary Schools, is designed to furnish an Introductory Course in Written Arithmetic, and is confined to the rules and problems must used in every day business.

BEOOKS NORMAL MENTAL ABITHMETIC, A complete text-book upon the subject of Mental Arithmetic, acknowledged to be the most philosophical and exhaustive work of the kind that has yet appeared, is now used as a standard work in the majority of the best achools in Pennsylvaum. It contains a few pages of Mental Algebra, showing the use of the algebraic letters in working problems involving unknown numbers.

BROOKS' KEY TO NORMAL MENTAL ARITH-METIC. A lucid expositor to the above, contains many excellent suggestions and as an assistant to the teacher of Mental Arithmetic, or the private student, will be found of great value. It contains valuable suggestions on methods of Teaching Mental

Arithmetic, and also an interesting collection of problems for working up classes during a dull exercise. BROOKS' NORMAL WRITTEN ARITHMETIC. Designed to accompany the Normal Mental Arithmetic, is so admirable a treatise upon the science of numbers that it has caused the repeated revision of other works with which it has BROOKS' KEY TO THE NORMAL WRITTEN

ARITHMETIC,

Designed as a Key to the above in which the principles anmethods of Teaching therein presented are more fully developed, for the aid of instructor and Student. BROOKS' NORMAL ELEMENTARY GEOMETRY, Designed as an Elementary Work for Popular use, contains many new and simplified demonstrations in Geometry and Trigonometry. It presents the practical part of the subject in about one half of the space usually devoted to it, without breaking the chain of logic, and is regarded as a most valuable addition to our educational literature. A number of Practical Problems are given after each Book, applying the principles tangent in the demonstrations. Theories for original thought, without demonstrations, are also given, requiring pupils to fry their unfledged wings in demonstrating without the sid of the text.

The publishers of the foregoing works, Messra Sower, Barnes The publishers of the foregoing works, Messrs, Nower, Barnes & Potts, have in their possession letters recommending this entire Series in flattering terms from a large number of the most prominent educational magnates in this country, including such names as John S. Hagt, LL. D.; James Waters, Principal Academy Department, University at Lewisburg, Pa., Thes. C. Porter D.D., Professor Natural Sciences, Frank-in and Marshal College, Lancaster, Pa.; Joseph W. SOWER, BARNES & POTTS. No. 37, North Third Street, Philadelphia, Penn. THE UNDERSIGNED, BY AN AR-RANGEMENT, with George W. Childs, Esq., the eminent Book Publisher, respectfully announce that they have become sole Publishers of his

Entire List of School Publications, and that they are now preparing new editions of the following well known and highly appreciated works:

I. PETERSON'S PAMILIAR SCIENCE.

SCENTIFIC EXPLANATION OF COMMON THINGS To which is added Professor John Henry Pepper's popular treaties on Scientific Amusements for Young People: 12 mo. 19 pages, containing 160 illustrations. The vast field covered by the Modern Sciences, and the enormous amount of labor and study required of pupils to attain even a general knowledge of the multitude of absolutely important subjects pressing upon their attention, are creating grave discusions among the best educators concerning the limits of endurance of the Youthful mind and causing them anxiously to look round for more condensed works, containg clear, logical, but short and easily understood epitomes of the subjects of which they treat. It has been the especial aim of Sower, Barnes & Potts to supply this great want in their School Publications, and this work on Familiar Science has been accepted by them as admitably calculated to meet the educational necessity above referred to. The immense sale the work has already had is the lest evidence of the high evidence in which it is held among those best able to judge of its merits.

FAMILIAR SCIENCE; 18 mo., 305 pages This small work (an excellent abridgement of the foregoing) has also had an immense sale, and in announcing a new edition the publishers feel assured that the demand for it will be

These elegantly printed and superbly illustrated works have been made Text Books in many of our most celebrated schools and colleges: Their plans, accuracy, and simplified mode of backing Astronomy, have received the commendations of the learned both in Europe and America. The larger work is divided into five parts: The first fronts of the laws which governs leavenly bodies; the second, of the components of the solar system, and the phenomena attending their movements; the third, of the sidercal heavens, cubracting the fixed stars, clusters and nebulua; the fourth, the principal instruments used in the observatory; and the fifth, of the globes, to which are appended two celestical maps and a comprehensive Astronomical Dictionary. In the "Abridged" volume the contents are identically the same, excepting that in the latter all is emitted effer Part fourth. The late eminent author and attronomer, Dr. Thomas Dick, of Scotland, in reviewing this ducational work says. incational work says.

"Benyer's Familiar Astronomy embraces almost everything requisite for imparting to general readers a knowledge of every tranch of Astronomical science, and the information it communicates is both simple and correct.

"The volume is hand-comely get up; the pictorial illustrations are beautiful and accurate, particularly those which exhibit the nebulda and other phenomenia of the sidereal beauties. It is a work which reflects great merit on the accompish lady which produced it, and will hand down her name with hence to future renerations." with honor to future generations."

In this estimate Dr. Oick is sustained by such eminent contemporaries as Sir John F. Herschel, Stephen Alexander, Professor of Astronomy, Princeton College; John H. Pepper, Esq., Director of the Boyal Pelytechnic Institution, London; Dr. J. P. Nichol, Professor of Practical Astronomy, in the University of Glasgow, Scotland; Lieut. M. F. Maur; Rear Admiral W. H. DR. P. H. CARDWELL

HAS THIS DAY EFFECTED AN arrangement by which he will be able in the future to supply all persons who may desire, from a single to a full set of teeth, on the VULCANIZED RUBBER BASE, Being the latest improvement in our profession, and having been sufficiently tested to warrant its utility, we take pleasure in recommending it as being far preferable in many respects to any other hase heretofore used. It can be used in many instances where all other materials fail. No one need, therefore, despair. Call on me, give me your work and I will demonstrate these facts.

Remember that a fail set of teeth on this method cost only half what they would an old and yet preferable in all sevenets.

GOOD NEWS TO THE TOOTHLESS! DR. J. FOUCHE HAS SECURED the assistance of a thoroughly competent workman, by which he will be enabled in future to insert Artificial Teeth on Gold, Rubber, and all other substances used for basis, in the most perfect manner and with the greatest despatch, at the most period manner and with the greatest despatch, at prices below the regular Cincinnati rates, and greatly below any rates heretofore charged in this locality. Why should any one "Gum it" when teeth can be had so cheap? If you wish the luxury of thorough mastication, give me a call, and if I don't satisfy you both in work and price, you will be hard to please.

THE EUREKA GIFT ASSOCIATION

would call attention to the fact of its being the Original and Largest Gift Association in the country. We are therefore enabled to send Finix Goone, and give better chances to obtain the more valuable prizes, than any other establishment of the kind. The business continues to be conducted in a fair and honorble manner, and a large and greatly increasing trade is proof that our patrons appreciate this method of obtaining rich and elegant goods.

During the past year this Association has sent a very large number of valuable prizes to all parts of the country. Those who patronine us will receive the full value of their money, as no article on our list is worth less than One Dollar, retail, and there are no blanks.

Parties dealing with us may depend on having prompt returns, and the articles drawn will be immediately sent to any address by return mail or express.

The following parties have recently drawn valuable prizes from the Eureka Association and have kindly allowed the use of their names, many other names might be published were we permitted:
